

YOUR CAREER IN SHEET METAL

The sheet metal industry needs highly skilled and motivated workers. Through courses offered at state-of-the-art training centers, you can get the high quality education and training designed to put you on the path to a rewarding career. As an apprentice, you participate in both on-the-job training and classroom study, allowing you to gain practical experience while learning the technical aspects of the industry.

It's time to reconsider the skilled construction trades. In fact, an education as a skilled union craftsman has never looked more appealing.

BEING A SHEET METAL APPRENTICE

When you enter an apprenticeship, you agree to work in an on-the-job training program and attend specialized classes for between four and five years. As an apprentice, you:

- Earn a good salary while learning your trade – a salary that increases as your skills and knowledge increase
- Pay little to no tuition costs or fees
- Receive books and other educational material free of charge
- Learn from instructors who have hands-on experience in the sheet metal industry
- Put everything you learn to work right away—your career begins with your apprenticeship
- Graduate without student loan debt

WHAT IS SHEET METAL ROOFING?

In this field, you will work outdoors on commercial roofing systems. In the classroom and on-the-job training, you will focus on methods and equipment designed to keep you safe. You will also learn about the different types of low slope roofing systems including: built up roofs, modified bitumen roof membranes and single ply membranes. You will also study other types of roofing designs such as green roof systems.

Opportunities in this field include:

- Job superintendent
- Foreman
- Estimator
- Installer
- Safety and risk manager

REQUIREMENTS

As with any other field, there are some basic requirements for a career in the sheet metal industry. You'll need a high school or GED diploma, and in some parts of the U.S. and Canada, you might have to take a written exam and/or complete a personal interview. Other skills needed include:

- Good physical condition
- Above average mechanical and math skills
- Good eye-to-hand coordination
- Understanding of spatial relationships
- Understanding of how patterns are used to create metal forms
- Excellent work and study habits
- Ability to work well in teams
- Solid reasoning skills
- Problem solving capability
- Enjoy working with your hands
- Reliable and responsible
